DETAILED ACTION

Applicant's amendment submitted 26 June 2009 necessitated a further species election between the types of raw plant material now required in the elected product claims.

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Plant material from *Daucus*, *Helianthus* and combinations thereof.

Applicant is required, in reply to this action, to elect a single species (i.e. elect plant material which is either *Daucus*, *Helianthus* or a particular combination thereof) to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

No claims are generic.
